Professional Summary

Android-focused software engineer with 6 years of combined experience in Android application development and Android Enterprise technical support. Experienced in building and maintaining Android applications using Kotlin, Jetpack Compose, MVVM, Firebase, and modern Android architecture principles. Former Android Enterprise Technical Support Expert supporting Google's Android Enterprise ecosystem, specializing in enterprise mobility, device management, Android platform troubleshooting, and partner enablement. Currently based in Tokyo, developing Android applications and preparing Google Play releases while continuing Japanese language studies.

Core Competencies

Android Development • Kotlin • Java • Jetpack Compose • Navigation Compose • Android SDK • MVVM Architecture • Clean Architecture • Modular Architecture • Coroutines • Flow / StateFlow • Hilt • Room • DataStore • Retrofit • Firebase Authentication • Firestore • Firebase Crashlytics • REST APIs • Material Design 3 • Git • Gradle • Android Studio • Android Enterprise • Android Management API • DevicePolicyManager • Managed Google Play • Enterprise Mobility Management (EMM) • Mobile Device Management (MDM)

Professional Experience

PERSONAL ANDROID DEVELOPMENT PROJECTS | TOKYO, JAPAN OCTOBER 2025 – PRESENT

Currently on a planned career break after relocating to Japan, while continuing to design and develop Android applications.

- Relocated to Japan and actively developing Android applications while studying Japanese.
- Developing a customizable Android launcher built with Kotlin and Jetpack Compose, currently being prepared for Google Play release.
- Built a personal AI chat application integrating AI APIs, Firebase Authentication, cloud synchronization, and conversational user interfaces.
- Developed an expense tracking application utilizing Jetpack Compose, local persistence, and MVVM architecture.
- Apply modern Android development practices including modular architecture, offline-first design, and state-driven UI development.

Projects (GitHub): <https://github.com/klarkengkoy>

ACCENTURE INC (INDIRECT CONTRACT: GOOGLE)

Android Enterprise – Technical Support Expert	April 2023 – September 2025
Android Enterprise – Technical Support Analyst	July 2021 – March 2023
Custom App Engineering Analyst	March 2023 – September 2025
Advanced App Engineering Analyst	July 2021 – March 2023

- Provided advanced technical support for Google's Android Enterprise ecosystem and enterprise partners.
- Investigated Android platform behavior involving device provisioning, work profiles, managed devices, enterprise app deployment, and policy enforcement.

- Supported integrations involving Android Management API, Google Play EMM API, DevicePolicyManager, Mobile Device Management (MDM), and Enterprise Mobility Management (EMM) solutions.
- Analyzed Android application behavior involving Firebase Cloud Messaging (FCM), WorkManager, and enterprise deployment scenarios.
- Maintained and enhanced internal Android applications used for Android Enterprise testing and validation.
- Developed internal tools and automation solutions to improve operational efficiency.
- Authored technical documentation and knowledge resources to support partner investigations and troubleshooting.

SOFTWARE DEVELOPER | SOFTWARE VENTURES INTERNATIONAL – PASIG, PHILIPPINES MARCH 2019 – MARCH 2021

- Served as the primary Android engineer responsible for the development, architecture, and maintenance of a suite of 10+ interconnected Android applications supporting HR and workforce management solutions.
- Developed Android applications integrating fingerprint and facial recognition technologies with backend systems.
- Designed communication and integration workflows across multiple Android applications within a modular ecosystem.
- Migrated legacy Java Android applications to Kotlin while maintaining production stability.
- Developed schema-driven Android applications capable of generating dynamic user interfaces based on backend configurations.
- Collaborated on backend services and Angular-based web applications.
- Mentored two junior developers and led Android knowledge transfer activities prior to project transition.

Education

JAPANESE INTENSIVE COURSE

Arc Academy Shinjuku | January 2026 – March 2026

Kichioji Language School | July 2026 - Present

BACHELOR OF SCIENCE IN ELECTRONICS AND COMMUNICATIONS ENGINEERING

Polytechnic University of The Philippines – Manila, Philippines | 2018

Certification

- Android Enterprise Expert – Android, Issued Jul 2022
- Artificial Intelligence and Machine Learning – Skillsoft, Issued Jul 2025
- ChatGPT Prompt Engineering Examples & Use Cases – Skillsoft, Issued Jul 2025
- Generative AI APIs for Practical Applications: An Introduction – Skillsoft, Issued May 2024

Languages

- English – Professional Working Proficiency
- Filipino – Native
- Japanese – N5 Coursework Completed, Currently Studying N4
